实验二: Typst 模板实现

I. Introduction

This is a simple template that can be used for a report.

II. Features

II.1. Colorful items

The main color can be set with the main-color property, which affects inline code, lists, links and important items. For example, the words highlight and important are highlighted!

- These bullet
- points
- are colored
- 1. It also
- 2. works with
- 3. numbered lists!

II.2. Customized items

This is a codeblock.

```
fn main() {
  println!("Hello Typst!");
}
```

Figures are customized but this is settable in the template file. You can of course reference them: Listing 1.

Listing 1 — Code example

```
fn main() {
    println!("Hello Typst!");
}
```

Figure 1 — What a figure!

This is a figure.

Figure 2 — What a figure!

This is another figure.

III. Enjoy!
